RADIO FREQUENCY (RF) SKIN TIGHTENING

Radio Frequency (RF) is a non-surgical skin tightening treatment that tones and firms loose, sagging or ageing skin. RF treatments can address lax skin on virtually any part of the face or body.

*WE USE THE VERY LATEST RF TECHNOLOGY
– FAST, EFFICIENT AND ABOVE ALL – SAFE.*

The procedure involves using energy waves to heat the deep layer of your skin. This stimulates collagen fibre and elastin production. With just a few sessions there is a noticeable difference in skin tone and brightness.

Treatments are comfortable, non-invasive and do not require any downtime. RF Skin Tightening offers a convenient, pain-free solution for enhancing your physique, appearance and body image confidence without the cost, hassle, discomfort and downtime associated with traditional tightening surgery.

Immediate benefits of an RF treatment include:

- Tightening and toning of loose, sagging skin
- Improved skin elasticity and firmness
- Invigorated circulation and improved lymphatic flow
- Visibly reduced and smoothed cellulite.

MICRO NEEDLING/CIT

Micro-needling, also known as Collagen Induction Therapy (CIT) is a minimally-invasive therapy that works by triggering the skin's own repair mechanisms to naturally produce collagen and elastin. The foundational principle of this treatment is that piercing the skin stimulates your body's natural collagen production.

Micro-needling uses multiple fine needles to vertically pierce the skin. This technique creates micro-openings and allows active ingredients (such as peptides, anti-oxidants, hyaluronic acid, etc.) to penetrate deeply and effectively into the dermis.

This treatment enhances skin rejuvenation results and is much safer than ablative lasers because there is much less damage to the epidermis (the top layer of the skin). You will achieve a more natural and rejuvenated look with CIT.

How does it work?

Using a pen with multiple fine needles, small channels (openings) are created in the skin to allow nutrients, vitamin C/ hyaluronic acid to be absorbed.

This process stimulates the release of growth factors, platelets and the induction of new collagen and elastin (the naturally occurring framework of your skin).

The production of new collagen and elastin induces a younger, healthier, plumper and firmer skin which reduces the appearance of wrinkles, fine lines, acne scars and overall better tone and texture.

FOR THE BEST RESULTS WITH MICRO-NEEDLING WE RECOMMEND A MINIMUM OF FOUR TREATMENTS.

Micro-needling/CIT (per treatment).....	139

SEMI-PERMANENT COSMETICS

SEMI-PERMANENT COSMETICS

With our in-house cosmetic tattooing specialist and the very latest industry techniques, we aim to achieve a natural personalised look that will give your make-up a fresh 'just applied' appearance all day, every day.

Whether it's a powder brow, ombre brow or micro-blading – we carry out a thorough consultation to discover:

- Your ideal/preferred style
- The perfect colour for you – using pigment swatches to see how the colours react to your skin tone
- Whether you are concerned about any aspects of the treatment or post-treatment care.

Our combination of brow-mapping/pre-drawing techniques with precise measurements allow you to see and approve the expected result. Continuous feedback throughout this process ensures we achieve your desired look and you are 100% happy before you to the pigment application stage.

Once you are happy with the pre-drawn brow and ready for the treatment we will apply a numbing product to help keep you comfortable. This can be reapplied as required.

All our colour pigments are of the highest possible quality. These are designed to fade naturally to a lighter shade of the same colour – so there should be no unexpected colour shifts over time. If you are interested in our semi-permanent cosmetics speak to one of the Cinnamon team and book in for a free semi-permanent make-up consultation.

ALL OUR PRICES INCLUDE A SECOND 'TOP-UP' TREATMENT FOR THE BEST POSSIBLE RESULTS.

HOLISTIC TREATMENTS

Reiki

Reiki is a traditional healing technique based on the principle that the therapist can channel energy by the means of touch. Reiki activates the natural healing processes of the body and restores physical and emotional well-being. It is a holistic system for balancing, healing and harmonising all aspects of the person – physical, mental, emotional and spiritual.....

111

Reflexology

Reflexology involves the application of pressure to the feet and hands with specific thumb, finger, and hand techniques without the use of oils or lotions. A relaxing and stress relieving treatment, the theory behind reflexology is that the areas manipulated correspond directly to the various organs and systems of the body.

55

Indian head massage

Indian head massage uses and adapts classic Swedish massage techniques for treating the scalp, face, neck, shoulders and upper arms. It works on the areas of the body most affected by stress, however, while the treatment is focused on the upper part of the body its effects can be felt throughout the *entire* mind and body

55

Hopi ear candling

Cotton tubes containing beeswax, honey and therapeutic oils are gently inserted into the ear to draw out impurities and relieve pressure in the head and sinuses. Hopi ear candling can help to alleviate symptoms of headaches, migraines, hay fever, sinus congestion and tinnitus.
